

SCHAEFFLER GROUP

Set Your Career in Motion

Schaeffler Graduate Trainee Programme

Jump start your career

- Solid foundation in precision engineering
- Extensive continued education
- Wide range of opportunities for career advancement

Be part of our success!

Join the Group that develops and manufactures precision products for everything that moves – in machines, equipment and vehicles as well as in aviation and aerospace applications. Let's Move the World Together.

Schaeffler Graduate Trainee Programme

First step right

If you have just graduated as an engineer; have a fair idea about which areas you would like to specialise in, and would like to explore your talents and skills in specific real-life applications, then our "Schaeffler Trainee Programme for Graduate Engineers" is just what you need.

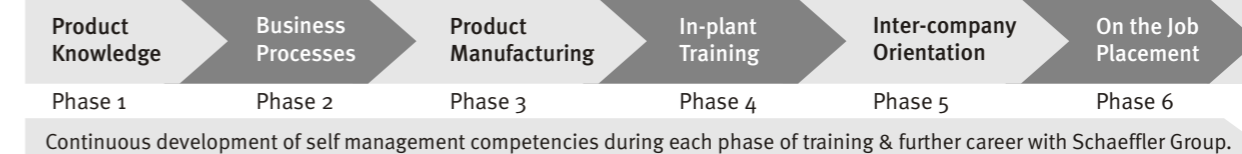

Fit for present & future

When you participate in the programme, we work with you to fine hone and polish the talents and skills which you will require most in the department you would like to work in. When you complete the programme, you will be ready to be assigned a management position that matches your capability.

Continuous competency development

To ensure that your potential gets the performance canvas it deserves, our management development programmes along with medium & long term development also provide you responsible projects & tasks in our international organisation.

Campus to corporate

Schaeffler Group

The Schaeffler Group is a leading global manufacturer of rolling bearings and linear products, as well as a renowned supplier to the automotive industry of high-precision products and systems for engines, transmissions and chassis applications. The Group comprises brands like INA, FAG & LuK and stands for exceptional customer focus, innovative ability and the highest possible level of quality. Worldwide the Schaeffler team consists of approximately 61,000 employees spread across 180 locations in over 50 countries.

Schaeffler Group in India

Schaeffler Group is well represented in India. Each of its three brands - INA, FAG and LuK have successfully established their presence in the country and ensured cost effective local production, responsive service and seamless application engineering & sales support.
