Systematic car repair.

From failure diagnosis to part identification.

Diagnosis/Set-up

No two repairs are ever exactly the same.

Error-free failure diagnosis is essential for efficient car repair. LuK supports you at every step along the way – from the diagnosis to identifying the correct parts.

LuK always offers the right solution from the beginning to the end of each repair.

OE quality

LuK RepSet® – the basic set for a quick replacement.

The number one solution for quick and trouble-free clutch repair offers top quality products and guarantees professional work.

LuK RepSet® is the repair solution with clutch disc, clutch pressure plate and release bearing.

LuK RepSet®Pro – the professional set with strong components.

The ideal solution for complete clutch replacement in modern cars. Recommended by leading car makers this made-to-measure kit allows you to replace all system components at once including the central slave cylinder (CSC).

LuK RepSet®Pro is the repair solution with clutch disc, clutch pressure plate and CSC.

LuK Hydraulic Systems – perfect transmission in OE quality.

Optimal power transmission between pedal and clutch.

LuK hydraulic systems are repair solutions with master/slave cylinders and CSCs available as individual components or complete systems.

LuK Dual Mass Flywheel – vibration isolation in OE-quality.

Outstanding solution for vibration isolation across the entire rpm-range of modern vehicles.

The LuK dual mass flywheel (DMF) is the OE-quality repair solution without compromises from the inventor of the system.

LuK RepSet®DMF – the power kit for powerful drive trains.

Excellent for vehicles with integrated dual mass flywheel. The all-in-one kit for a systematic repair.

LuK RepSet®DMF is the repair solution with clutch disc, clutch pressure plate, CSC, dual mass flywheel and fastening screws.
