F'IS – First in Services

Optimizing plant availability and avoiding unplanned downtime are the main priorities of FAG Industrial Services and Condition Monitoring Services Australia. As the service company of Schaeffler Group Industrial, we offer maintenance products and services for every sector. F'IS has an expert and effective solution for every aspect of maintenance, whether this involves bearing assembly, bearing reconditioning, lubrication or condition monitoring. Our quality requirements are strongly influenced by the many years of experience of the INA and FAG brands in manufacturing precision rolling bearings.
