

In the spotlight.

LuK RepSet 2CT – the repair solution
for dry double clutches.

SCHAEFFLER

FAG

Unique worldwide clutch competence.

LuK, a company rich in tradition, has been active in the clutch market as an original equipment supplier to almost all automobile manufacturers for over 50 years. With a comprehensive systematic approach, the original equipment product portfolio stretches from the clutch to the dual mass flywheel and all its corresponding hydraulic components.

For garages a clutch repair is daily business. It must be done quickly and without complications. LuK offers optimal spare parts and repair solutions. Clutch disc, pressure plate, release bearing, and all other peripheral clutch parts or one complete repair solution in a box. The LuK RepSet family includes everything required for an easy, value-retaining repair.

Innovation from LuK: the dry double clutch.

The objective: more comfort when de-clutching and accelerating with reduced fuel consumption.

The solution: dry double clutch technology was developed by LuK and put into production in 2008. The dry double clutch consists of two partial clutches and the corresponding actuating elements that operate one manual gearbox. It combines the comfort of an automatic with the dynamic sports feeling and effectiveness of a manual gearbox.

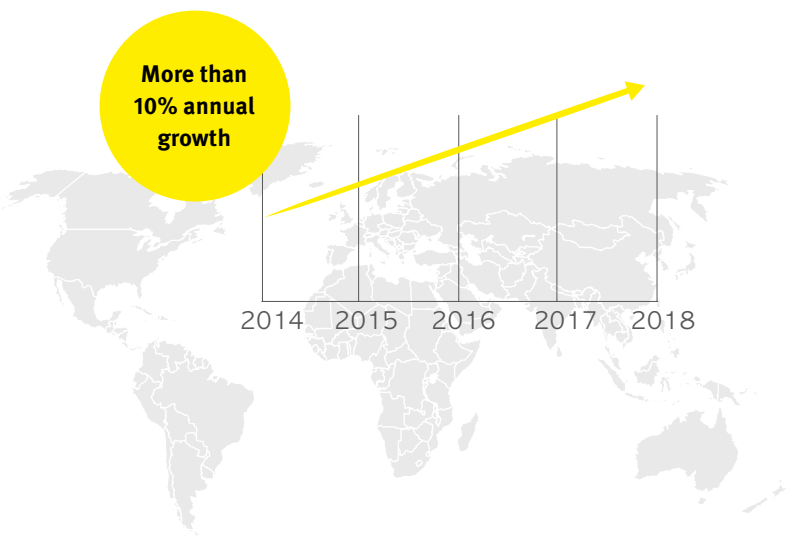

The repair solution: a unique repair solution from LuK.

The dry double clutch, like the standard clutch, is a classical wearing part. Its replacement, however, is more demanding and complex. We do not leave you alone with this challenge, but give our total support with a unique repair solution including all the parts needed for assembly and fitting, the correct special tools, an excellent training program, and all relevant information materials.

Our idea of a happy ending with system – in theory and in practice.

A huge potential: The dry double clutch technology is being increasingly used by more and more vehicle manufacturers who guarantee their customers a balance between regular driving and a sports feeling. There is a growing market with a huge potential.

LuK RepSet 2CT: systematic repair solution.

We support you in theory and practice:

- Detailed product information from the technology and its function to solid assistance for the repair
- Intensive training program from experienced master mechanics
- Perfectly matched special tools for the entire repair: from damage diagnosis to dismantling and refitting and returning to service life

The advantages of the LuK RepSet 2CT:

- The best and unique OEM quality
- The only repair solution of its kind in the aftermarket
