Cost-effective plug & play solutions

You give us the task, we develop the matching linear actuator for you – in a cost-effective and high-performance design. In addition, we combine our high-quality components with solutions from the Schaeffler system platform, and include the necessary drive and control technology. After a short implementation period, you will receive your individualized linear actuator from a single source. It goes without saying that we maintain Schaeffler’s commitment to quality.

What is also worth mentioning: The use of our planetary screw drive (PWG) provides the highest power density in linear actuators when downsizing is required.

Advantages at a glance:
- Cost-effective individual solutions
- Highest power density, downsizing is therefore possible
- Efficient system development
- Short implementation times

Here are some examples of customer-specific electromechanical actuators and positioning systems from the Schaeffler system platform.

Transmission actuator
Stroke actuator
Heavy duty actuator
Positioning system
Linear actuators
from components to systems
