Who is the World Bearing Association?

WBA is a non-profit and unincorporated industrial association. It was founded in 2006 by three major, regional bearing associations: The American Bearing Manufacturers' Association (ABMA), the Federation of European Bearing Manufacturers' Associations (FEBMA) and the Japan Bearing Industrial Association (JBA).

WBA promotes the common, lawful interests of the world bearing industry, such as open economic engagement, sustainable development and the protection of legal rights.

Supported by:

JBA **FEBMA** **ABMA**

What are we doing about it?

The WBA has created an Anti-Counterfeiting Committee.

This Committee is dedicated to addressing the counterfeiting of premium brand bearings and to assisting law enforcement agents in the eradication of it.

We help to identify counterfeit products.

If you suspect counterfeiting activity, please contact the premium brand manufacturer directly.

It is important to alert the premium manufacturer concerned before sharing any suspicions with your distributor or supplier.

One effective way to identify counterfeit bearings with certainty is with the help of premium brand manufacturers. If you suspect that you may have purchased or distributed counterfeits, contact the premium brand manufacturer directly.

Counterfeiting is a crime in many countries. Suspected manufacturers and dealers of counterfeit bearings can face criminal prosecution, in addition to civil litigation.

We cooperate with local law enforcement around the world.

WBA participating companies assist local law enforcement with information and identification of counterfeits, to help find and prosecute counterfeitters. We assist the authorities to conduct raids and investigations of suspected counterfeit operations.

One fake bearing could break your business.

What's the problem with fake bearings?

You're not getting what you paid for.

When you decide to buy name brand, premium products, that are faulty, genuine, premium brand products.

They may also be old, or even used, premium brand products, that are counterfeit and possibly to look new.

Faulty and worn-out bearings can damage and fail quickly. At best, this will only lead to equipment downtime and repair. In addition, when a counterfeit bearing fails, there may be financial and legal consequences to you, the buyer.

In addition, a faulty, counterfeit bearing may have legal consequences for you as a buyer and/or distributor. This will happen if this will only lead to equipment downtime and repair. Faulty and worn-out bearings can damage and fail quickly. At best, this will only lead to equipment downtime and repair. In addition, when a counterfeit bearing fails, there may be financial and legal consequences to you, the buyer.

So, when you pay for premium and get average, or even downright faulty products, you get cheated. Make sure you, the buyer, gets things you want. Awareness comes before action. Help your friends and associates to tell them about the problem.

Informational material to download, print and link from your own Web site. Premium brands are subject to counterfeiting worldwide. To protect yourself, your business and the public from counterfeit bearings, always inform your business and the public from counterfeit bearings, always through e-mail and social media networks. You'll also find ways to report instances against counterfeiters by letting them know about the problem.

It's often hard to tell the difference between a genuine bearing and a counterfeit one.

Counterfeits can be new, low-quality bearings, which are labeled with fake labels; fake bearings have "fake bearings", while "genuine bearings" are labeled with "genuine bearings".

They are part of illegal and unethical practices.

Counterfeiting is a crime in many countries. These are called counterfeits, such as pirates and raiders.

It's also theft of intellectual property, such as patents and trademarks, and piracy at sea. Due to the盗版和侵权行为, they are called pirates and raiders.
