5. ARCALUB-C1-125-REFILLABLE>P – 096805129-0000-10

Advantages – CONCEPT1 sustainable single point lubrication system

The CONCEPT1 is ready to use and is easy to install without any special tools. The lubricator can be refilled up to three times with Schaeffler Arcanol lubricants or the customer's own lubricant**. The flexible and cost-effective solution is ideal for machines that are difficult to access. With ATEX certification, it can also be used in potentially explosive atmospheres.

For more information or to take up this special offer, contact your **personal Schaeffler representative**.

If you require other options in larger quantities, such as other greases or empty cartridges, please let your representative know.

- * A combination of the individual offers with CONCEPT1 (lubricant-volume: 125 cm³) is not possible.
- ** Please check the use of your own lubricants with your Schaeffler representative.
